GUTMANN FPS-I

FRAME-INTEGRATED FALL PREVENTION SYSTEM

**INTEGRATED DESIGN OF
FALL PROTECTION**

*Exclusively
by taulo!*

GUTMANN FPS-I ***Frame-integrated fall prevention system***

GUTMANN's frame-integrated fall prevention system FPS-I was developed as an architecturally sophisticated solution for off-floor French windows and has been tested by the Buildings Inspectorate. Thanks to the system's integrated construction, all unsightly functional hardware is concealed by the aluminium shell. The transparent safety-glass pane is framed top and bottom only with an unobtrusive, filigree system edge protection profile. This innovative product combines transparency and safety in its elegant, timeless design and makes bulky additional safety structures superfluous.

Order online with tuulo

Thanks to an intelligent configurator, ordering our FPS sets is really easy.

tuulo is a GUTMANN digital tool that allows you to plan and order windows, doors and window sills really fast on your computer or tablet. All you need is your browser window. tuulo provides information about stock levels, delivery times and order status. tuulo not only calculates all orders in accordance with the agreed delivery terms, but can also handle complex configurations such as window sills and edging.

Order with just a few clicks

Tuulo provides a static pre-dimensioning function which makes it easier for customers to fulfil statutory requirements and standards. It is still possible to configure elements with any required dimensions, even if they are not within our approval limits.

- 1 Select system type and colour
- 2 Enter dimensions
- 3 Select frame profile
- 4 Select glass thickness
- 5 Start static pre-dimensioning check
- 6 Add to shopping cart
